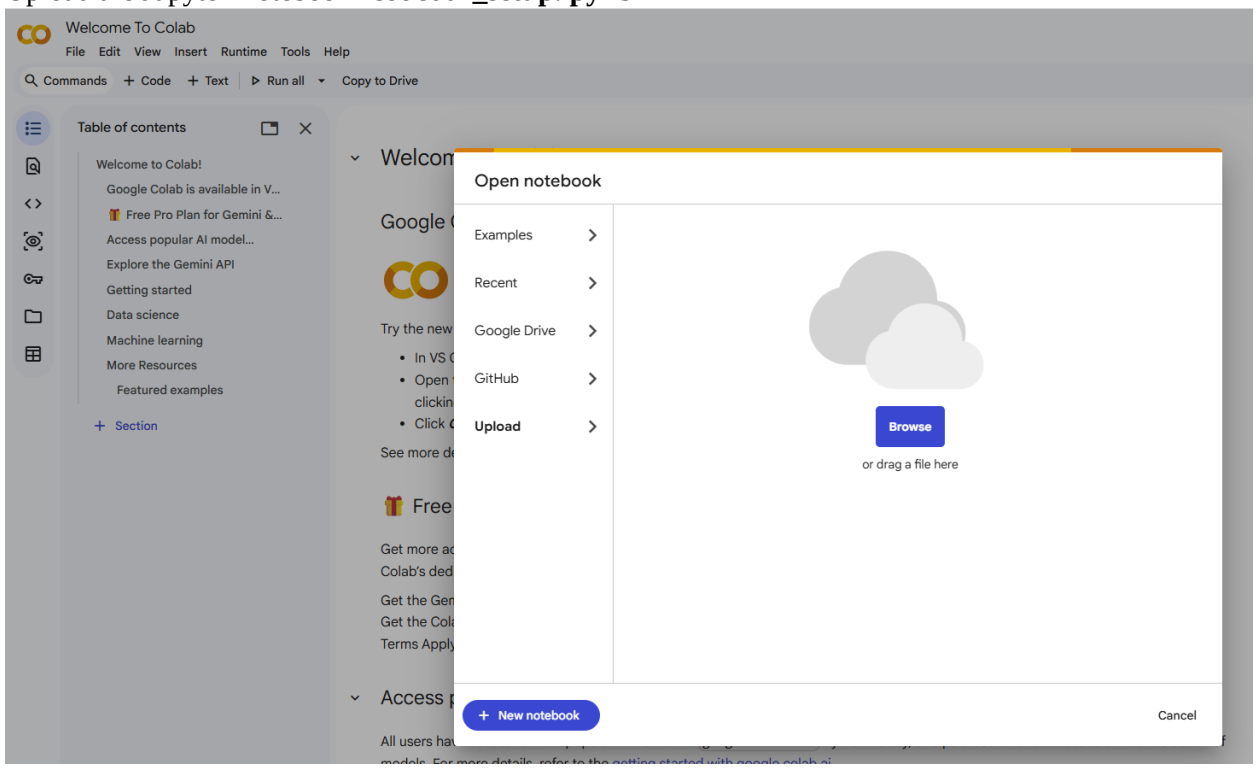
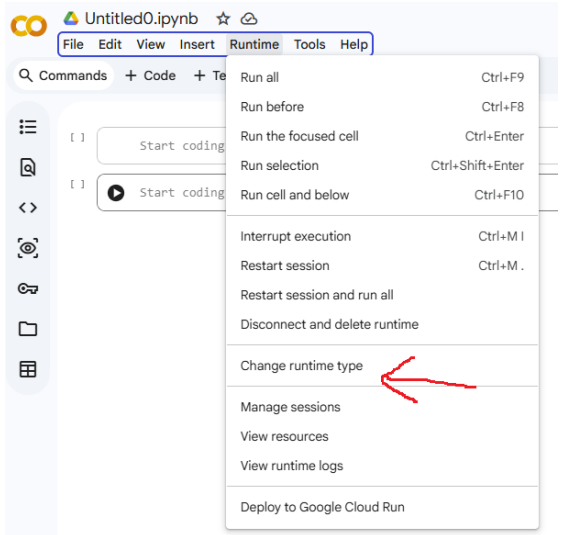
Instruction 1: A Quick Configuration on Google Colab

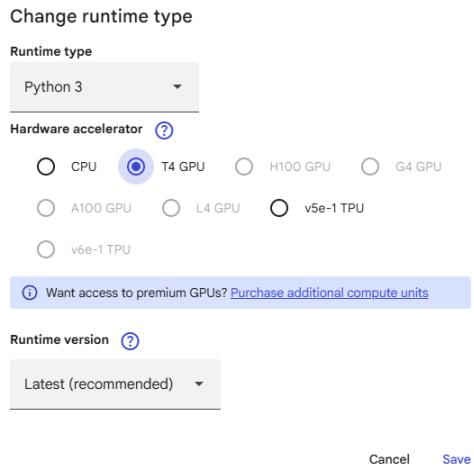
1. Open Google Colab: https://colab.research.google.com/

2. Upload the Jupyter Notebook "**code001_setup.ipynb**"

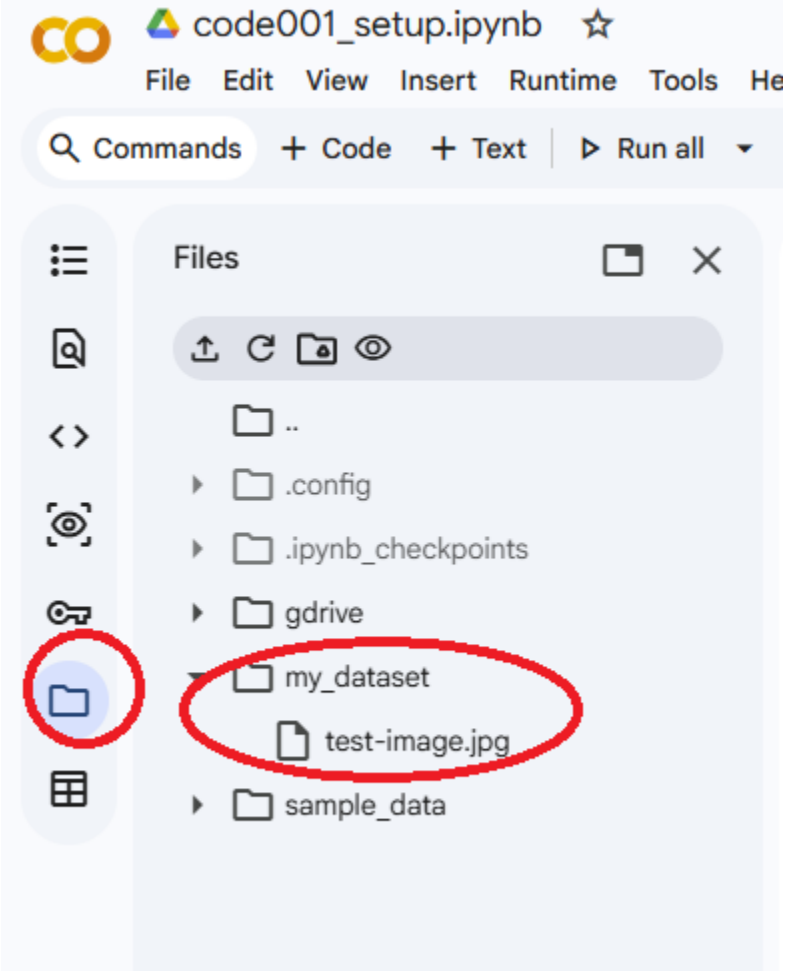


3. Select a GPU here





4. Create a folder named “my_dataset” and upload the image “test-image.jpg” to this folder



5. Run the cells one by one. If you can run all the cells without issues, you are all set!
